Open/close Help	+ +
Open/close the App Component Menu	+ +
Open/close Store	+ +
Open/close the App Component Switcher	+ +
Closes the active app component	+ +
Select to the next element	
Select to the previous element	+
Activate the selected element	
Return to the app component or window header (when inside an app component or window). Esc returns to the OWF Toolbar from anywhere else. To move to the toolbar from a widget header, press Esc.	

Table 2: Application Navigation

Layout	Key combination	Action
Accordion/Portal	+ +	Expands an app component
Accordion/Portal	+ +	Collapses an app component
Desktop	+ +	Restores collapsed app component or maximizes focused component
Desktop	+ +	Minimizes focused app component or resizes maximized component
Desktop, Portal*	+	Move the focused app component UP
Desktop, Portal*	+	Move the focused app component DOWN

Table 3: Toolbar Navigation

Location	Keyboard Combination
My Apps Window	+ +
The Store(s)	+ +
Help	+ +

This is not a complete list of keyboard navigation shortcuts. Use it as a quick reference of the most popular shortcuts.

Note: The keyboard navigation commands were last updated in OWF 7.0. Therefore, some commands will not work with features that have been updated since 7.0. For example, Tab/Shift + Tab will not select an element inside the My Apps or the App Components menus.

*In the Portal Layout, + or + only moves the app component above or below the adjacent app component. To continue moving the component, refocus it.
