# Release Notes

## Installation Information

Directions on how to install OZONE are found in the Configuration Guides for OWF and the Store.

## Upgrade Information

This release does not include database changes. To upgrade from the previous version, follow the upgrade instructions in the OWF and Store Configuration Guides' Appendices.

## Features for 7.17.0

This release focused on a major upgrade from Java 7 to Java 8. It also included upgrades to other libraries and various tasks and issues listed below:

### Tasks

- Upgraded to support Java version 8 in OWF and Marketplace
- Upgraded Grails to version 2.4.2 in OWF and Marketplace
- Upgraded the Elasticsearch plug in to version 0.0.4.6
- Added support for the following databases: Postgres, Oracle and SQL Server in Marketplace
- Added support for SQL Server database in OWF
- Build improvements to the `owf-auditing` and `owf-security` repos

### Community Patches

- Fixed an issue synching users' widget definitions with external group changes in OWF

### Issues

- Added missing MySQL database scripts in Marketplace
- Fixed an issue regarding adding a widget to the Administrators' Group in OWF; users had not been receiving it.
- Added a widget to the Administrators' Group does not add the widget to the user in OWF
- Fixed primary key collisions in `PostgreSQLPrefsInitialCreate.sql` in OWF
